

Basic Facts - Doubles Sub and Add

Introducing the "Must Know" Basic Doubles Facts

$1 + 1 = \underline{\quad}$

$6 + 6 = \underline{\quad}$

$2 + 2 = \underline{\quad}$

$7 + 7 = \underline{\quad}$

$3 + 3 = \underline{\quad}$

$8 + 8 = \underline{\quad}$

$4 + 4 = \underline{\quad}$

$9 + 9 = \underline{\quad}$

$5 + 5 = \underline{\quad}$

$10 + 10 = \underline{\quad}$

Using Addition Doubles to do Subtraction

If you know $6 + 6 = 12$ THEN you also know $12 - 6 = 6$

$12 - 6 = \underline{\quad}$

$6 + 6 = \underline{\quad}$

$14 - 7 = \underline{\quad}$

$7 + 7 = \underline{\quad}$

$16 - 8 = \underline{\quad}$

$8 + 8 = \underline{\quad}$

$10 - 5 = \underline{\quad}$

$5 + 5 = \underline{\quad}$

$8 - 4 = \underline{\quad}$

$4 + 4 = \underline{\quad}$

$18 - 9 = \underline{\quad}$

$9 + 9 = \underline{\quad}$

$20 - 10 = \underline{\quad}$

$10 + 10 = \underline{\quad}$

$6 - 3 = \underline{\quad}$

$3 + 3 = \underline{\quad}$

If you know the Basic Doubles THEN

You also know the Doubles Plus One Facts

$5 + 5 = 10$ SO $5 + 6 = 11$ which is just one more

$4 + 4 = 8$

$4 + 5 = 9$

$5 + 5 = \underline{\quad}$

$5 + 6 = \underline{\quad}$

$3 + 3 = \underline{\quad}$

$3 + 4 = \underline{\quad}$

$6 + 6 = \underline{\quad}$

$6 + 7 = \underline{\quad}$

$8 + 8 = \underline{\quad}$

$8 + 9 = \underline{\quad}$

$2 + 2 = \underline{\quad}$

$2 + 3 = \underline{\quad}$

$9 + 9 = \underline{\quad}$

$9 + 10 = \underline{\quad}$

$40 + 40 = \underline{\quad}$

$40 + 50 = \underline{\quad}$

$30 + 30 = \underline{\quad}$

$30 + 40 = \underline{\quad}$

$20 + 20 = \underline{\quad}$

$20 + 30 = \underline{\quad}$

$50 + 50 = \underline{\quad}$

$50 + 60 = \underline{\quad}$

$10 + 10 = \underline{\quad}$

$10 + 20 = \underline{\quad}$

$60 + 60 = \underline{\quad}$

$60 + 70 = \underline{\quad}$

What do you think about your math minutes?

What was easy?	What was hard?

YOU NEED to know your ten sums and differences

WITHOUT counting

$1 + 9 = \underline{\quad}$	$9 + 1 = \underline{\quad}$	$10 + 90 = \underline{\quad}$	$90 + 10 = \underline{\quad}$
$2 + 8 = \underline{\quad}$	$8 + 2 = \underline{\quad}$	$20 + 80 = \underline{\quad}$	$80 + 20 = \underline{\quad}$
$3 + 7 = \underline{\quad}$	$7 + 3 = \underline{\quad}$	$30 + 70 = \underline{\quad}$	$70 + 30 = \underline{\quad}$
$4 + 6 = \underline{\quad}$	$6 + 4 = \underline{\quad}$	$40 + 60 = \underline{\quad}$	$60 + 40 = \underline{\quad}$
$5 + 5 = \underline{\quad}$	$5 + 5 = \underline{\quad}$	$50 + 50 = \underline{\quad}$	$50 + 50 = \underline{\quad}$

Now find the missing numbers

$\underline{\quad} + 6 = 10$	$7 + \underline{\quad} = 10$	$5 + \underline{\quad} = 10$
$3 + \underline{\quad} = 10$	$4 + \underline{\quad} = 10$	$2 + \underline{\quad} = 10$
$\underline{\quad} + 9 = 10$	$6 + \underline{\quad} = 10$	$8 + \underline{\quad} = 10$
$10 - \underline{\quad} = 6$	$10 - \underline{\quad} = 5$	$10 - \underline{\quad} = 3$
$10 - \underline{\quad} = 8$	$10 - \underline{\quad} = 2$	$10 - \underline{\quad} = 7$
$10 - \underline{\quad} = 4$	$10 - \underline{\quad} = 9$	$10 - \underline{\quad} = 1$
$10 - \underline{\quad} = 10$	$10 - \underline{\quad} = 0$	$10 - \underline{\quad} = 5$
$100 - 50 = \underline{\quad}$	$100 - 60 = \underline{\quad}$	$100 - 30 = \underline{\quad}$
$100 - 70 = \underline{\quad}$	$100 - 40 = \underline{\quad}$	$100 - 20 = \underline{\quad}$
$100 - 80 = \underline{\quad}$	$100 - 10 = \underline{\quad}$	$100 - 90 = \underline{\quad}$

What do you think about your math minutes?

What was easy?	What was hard?
